

MANAGEMENT SCIENCES FOR HEALTH
A NONPROFIT INSTITUTION

September 24, 1994

This is to serve as a recommendation for the work of Pablo Páez Monroy who has been of tremendous assistance with various tasks which he has undertaken in the field of management information systems. Pablo has repeatedly demonstrated a very high level of motivation, and a willingness and commitment to always get the job done in a high quality manner.

He is an accomplished programmer, a serious worker, and a creative individual. He has proven very effective in areas of training as well, and is able to anticipate the needs of the students, design the course accordingly, and write the protocols for the courses in a very impressive manner.

Pablo has worked with us both nationally in Ecuador, and internationally in Mexico. He is able to do both very well, and his first international assignment in Mexico proved to be a terrific success. During this contract under MSH, Pablo had to learn both the objectives as well as the source codes of a program designed to manage medical inventories, and then incorporate whatever changes were necessary in the program to adopt to the specific needs of the Ministry of Health in Mexico. He has been asked by this Ministry to return and be responsible for the maintenance and necessary adaptations in this program.

From a personal standpoint, Pablo is an excellent team worker, and is a pleasure to work with.

I would highly recommend him for work involving training, programming, maintenance, and hardware diagnoses, and just about anything else to do with computers.

Sincerely,

M. Roy Brooks, Jr.
